

The Sustainable  
Packaging Solution

# Sonopost® Protective Packaging

Looking for sustainable product protection?  
Keep your products damage-free  
throughout the manufacturing and supply  
chain network with Sonoco's assembly-free  
Sonopost® corner posts.

## Reduce waste and meet regulations.

Decrease your environmental footprint per product and  
increase logistics efficiency with our fully recyclable corner posts. After use,  
recycle this paper solution using curbside collection to reduce or eliminate  
end-of-life waste.

Meet European sustainability regulations with our full-paper corner posts, made  
from recycled paperboard and produced from post-consumer board. Sourced  
from Sonoco's European mill network, our corner posts come with a FSC  
certification (upon request) and a completed life cycle assessment.

## Stack more units and maintain integrity.

Maintain long-term stacking integrity even in humid conditions  
and transportation distances greater than 1200 km with our  
corner posts. Stack more units with minimal secondary  
packaging thanks to our Sonopost technology, which offers  
superior stacking strength, crush resistance and cushioning  
protection.

## Decrease cost and improve yield.

Lower material costs and improve yield with our assembly-free  
corner posts. Reduce labor costs and protect from clamp  
damage with our variety of corner post lengths and profiles  
shaped to hug corners and protect edges. If a standard design  
doesn't fit your needs, customised solutions can be provided  
from our packaging design team.

## Product Applications

- ▶ **White Goods**  
*washers, dryers, refrigerators,  
dishwashers, kitchen stoves, etc.*
- ▶ **HVAC**
- ▶ **Grills**
- ▶ **Heat Pumps**
- ▶ **Electronics**
- ▶ **Sanitary Equipment**
- ▶ **Medical Equipment**
- ▶ **Furniture**

## Key Benefits

- ▶ **Meet sustainability regulations.**
- ▶ **Recycle curbside.**
- ▶ **Bypass assembly challenges.**
- ▶ **Stack more units.**
- ▶ **Protect from clamp damage.**

Recyclable

### SONOCO PROTECTIVE SOLUTIONS

Sonoco expanded European  
production capacity with new  
Sonopost corner post lines in  
Sochaczew, Poland and  
Bursa, Türkiye as part of the  
Sonoco Alcore® European  
business. Our plants are  
strategically located to  
provide customers with the  
highest level of attention and  
timely delivery. We are  
developing customised  
solutions at our Bursa facility  
like a design and testing lab  
to assist customers in the  
packaging design process.
